The Role of Executive Functions in Classroom Learning and Behavior

Strategies for Assessment and Intervention

Applications for Executive Function Learning Needs from the person who WROTE the book!

Featuring World Renowned author, presenter, and authority: Dr. George McCloskey, Associate Professor, Director of School Psychology Research Philadelphia College of Osteopathic Medicine.

About the Program:

This presentation will discuss a comprehensive model of executive functions and the impact of executive functions on learning, behavior and classroom production. Ways to assess executive functions difficulties and methods for helping children with executive functions difficulties improve their behavior and academic performance either through teacher assistance or through increasing their capacity for self regulation will be addressed.

Expected Outcomes:
1. Describe executive functions, and their roles in classroom behavior, learning and production
2. Identify and use assessment methods to identify executive functions difficulties
3. Identify appropriate interventions for executive functions difficulties involving behavior and/or academic production
4. Access sources of information about assessment and interventions for executive functions difficulties involving behavior and/or academic production problems.
